GÜNTER MORGE¹

Diptera Collectionis P. GABRIEL STROBL — XI²

(Register zu P. GABRIEL STROBL'S Publikationsserie „Die Dipteren von Steiermark“)

3965 der insgesamt 6663 verschiedenen Dipteren-Spezies und -Varietäten seiner Kollektion sowie eine große Zahl der von ihm als neu beschriebenen Arten, Varietäten und Formen hat P. GABRIEL STROBL in seiner in „fünf Teilen“ erschienenen Publikationsserie „Die Dipteren von Steiermark“ deskribiert. (Er selbst und die meisten Entomologen, die ihn später zitierten, gehen von „fünf Teilen“ dieser Veröffentlichungsreihe aus, während es eigentlich sechs sind. P. STROBL hat aber stets seine Arbeit über „Die Anthomyinen Steiermarks“ (STROBL 1894b) nur als direkte Fortsetzung des eigentlichen II. Teiles dieser Serie (STROBL 1894a) betrachtet, woraus die vermeintlich lediglich fünfteilige Gliederung resultiert.) Durch die Tatsache, daß mithin ein sehr großer Teil aller Arten und Varietäten seiner Sammlung in dieser Serie zitiert wird, kommt ihr besondere Bedeutung zu. Demgegenüber aber ist festzustellen, daß die gesamte Publikationsserie nur durch ein sehr unvollständiges und teilweise auch fehlerhaftes Register am Schluß des „V. Teiles“ (STROBL 1910) absolut ungenügend übersehen werden kann, zumal dieser alphabetische Index zudem lediglich die Gattungen erfaßt und Arten und Varietäten etc. von vornherein ganz unberücksichtigt läßt. P. STROBL'S Arbeit aus dem Jahre 1910 war die letzte Veröffentlichung überhaupt von ihm vor seiner Lähmung und aus handschriftlich überlieferten Aufzeichnungen in seinen Korrekturen dazu ist ersichtlich, daß er sie, möglicherweise seine schwere Erkrankung schon ahnend, in beträchtlicher Eile zum Abschluß brachte, worunter wohl das Register gelitten haben dürfte und was zu seiner Unvollkommenheit beigetragen haben mag. — Um jederzeit ein rasches Auffinden der vielen Gattungen und Arten zu ermöglichen, ihre häufig mehrfache Erwähnung in den sechs Teilen und damit ihre systematische Deutung durch P. STROBL beachten zu können, schien mithin die Erarbeitung eines vollständigen Arten- und Gattungsregisters und damit die alphabetische Erfassung aller wissenschaftlichen Namen ratsam, das nun nachfolgend wiedergegeben wird.

¹ Wissenschaftlicher Abteilungsleiter der Abteilung Taxonomie der Insekten des Institutes für Pflanzenschutzforschung (BZA) der Akademie der Landwirtschaftswissenschaften der DDR zu Berlin, Bereich Eberswalde (DDR), und Kustos der Naturwissenschaftlichen Sammlungen und des Naturhistorischen Museums der Benediktiner-Abtei Admont (Österreich).

² Pars I: Beitr. Ent. 17, 151–224; 1967. — Pars II: Beitr. Ent. 19, 27–30; 1969. — Pars III: Beitr. Ent. 19, 31–44; 1969. — Pars IV: Beitr. Ent. 19, 569–593; 1969. — Pars V: Beitr. Ent. 24, Sonderheft, 161–431; 1974. — Pars VI: Beitr. Ent. 24, 383–416; 1974. — Pars VII: Beitr. Ent. 26, 323–338; 1976. — Pars VIII: Beitr. Ent. 26, 339–440; 1976. — Pars IX: Beitr. Ent. 26, 531–541; 1976. — Pars X: Beitr. Ent. 27, 3–6; 1977.

Die zeitaufwendigen Vorarbeiten auf Grund der unübersichtlichen Gliederung und die mühsame spätere Zusammenstellung des Gesamtregisters besorgte meine langjährige wissenschaftlich-technische Assistentin, Frau HELGA BLECH, der hierfür höchste Anerkennung und Dank zu zollen ist.

* * *

Inhalt und Aufbau nachfolgenden Registers sind einige Bemerkungen vorauszuschicken:

Wie in allen vorangegangenen zehn Teilen meiner gesamten Publikationsserie über die Dipteren-Kollektion P. STROBLs wurde auch in diesem Index bezüglich der Wiedergabe der Art-, Varietäten- etc. -Namen das Prinzip gewahrt, alle wissenschaftlichen Bezeichnungen in der Originalschreibweise P. STROBLs und damit unverändert gegenüber derselben zu zitieren. Gleiches gilt für die Zuordnung der Autorennamen, das heißt, sie sind jeweils in der Kombination wiedergegeben, wie diese sich bei P. STROBL in seiner Veröffentlichungsreihe findet. Nur in den Fällen, wo die Autorennamen dort völlig fehlen, wurden sie entsprechend ergänzt.

Da P. STROBL Arten, Varietäten etc. in den verschiedenen Teilen seiner Veröffentlichungsreihe fallweise unterschiedlichen Gattungen zugeordnet hat, wurde im Register eine Gattungsangabe bei den einzelnen Kategorien ganz weggelassen. Sie wird aus der entsprechenden Zitatseite in der von P. STROBL fixierten Kombination sofort ersichtlich.

Die römischen Zahlen im Register beziehen sich auf den betreffenden und nachfolgend im Detail zitierten Teil von P. STROBLs Veröffentlichungsreihe³. Die arabischen Zahlen geben die jeweilige Seite in diesem Teil an, ein * hinter der Seitenzahl weist auf die Fortsetzungsveröffentlichung P. STROBLs zum II. Teil der „Dipteren von Steiermark“ hin: „Die Anthomyinen Steiermarks“ (STROBL 1894b), eine oben schon erwähnte Besonderheit. (Diese Arbeit ist in der Separata-Form zusätzlich gesondert von I bis 64 paginiert. Um Verwechslungen auszuschließen, ist im nachfolgenden Register die Seitenzählung des betreffenden Jahrganges und nicht die des Separatums zitiert.)

- I = STROBL, G.: Die Dipteren von Steiermark. [I. Teil]. Mitt. naturw. Ver. Steierm. (Graz) 29 (1892), 1—199; 1893.
- II = STROBL, G.: Die Dipteren von Steiermark. II. Theil. Mitt. naturw. Ver. Steierm. (Graz) 30 (1893), 1—152; 1894a.
- II/...* = STROBL, G.: Die Anthomyinen Steiermarks. (Mit Berücksichtigung der Nachbarländer.). Verh. zool.-bot. Ges. Wien 43 (1893), 213—276; 1894b.
- III = STROBL, G.: Die Dipteren von Steiermark. III. Theil. Mitt. naturw. Ver. Steierm. (Graz) 31 (1894), 121—246; 1895.
- IV = STROBL, G.: Die Dipteren von Steiermark. IV. Theil: Nachträge. Mitt. naturw. Ver. Steierm. (Graz) 34 (1897), 192—298; 1898.

* Die hier wiedergegebenen Literaturdetails berücksichtigen zugleich eine erforderliche Berichtigung gegenüber einer übersehenen Druckkorrektur in den Schriftumsangaben zu dieser Publikationsreihe in P. STROBLs Veröffentlichungsverzeichnis (Beitr. Ent. 24, Sonderheft, 46—50; 1974).

V = STROBL, G.: Die Dipteren von Steiermark. II. Nachtrag. Mitt. naturw. Ver. Steierm. (Graz) 46 (1909), 45—293; 1910.

Im Register sind alle wissenschaftlichen Namen aufgeführt, die P. STROBL in seiner Publikationsreihe, in welchem Zusammenhang auch immer, zitiert hat. Ihre Wiedergabe in der dortigen Originalschreibweise erfolgt mit Ausnahme offensichtlicher Druckfehler.

* * *

Zusammenfassung

Im XI. Teil der Mitteilungen über die Revision der Dipteren-Kollektion P. GABRIEL STROBL'S werden alle wissenschaftlichen Namen seiner Publikationsreihe „Die Dipteren von Steiermark“ und „Die Anthomyinen Steiermarks“ in Form eines Registers in der Originalschreibweise und -kombination STROBL'S fixiert.

Summary

Part XI of the reports on the revision of P. GABRIEL STROBL'S collection of Diptera gives a survey of all scientific names of his series of publications „Die Dipteren von Steiermark“ and „Die Anthomyinen Steiermarks“. All names are cited in the original form printed in STROBL'S papers mentioned.

Резюме

В части XI ревизии коллекции двухкрылых СТРОБЛЯ даётся обзор над STROBL, G.: „Die Dipteren von Steiermark“ и „Die Anthomyinen Steiermarks“ (STROBL 1893—1910). Предисловие объясняет детали и методы ревизии автора.
